Archana C R

Age : 27 years

Job: Non - Systems Engineer at TCS

Location: Chennai

Background

- Archana is a Systems Engineer at TCS who has a busy and structured work routine.
- She occasionally orders food online, mainly when she does not have enough time or energy to prepare food after work.
- She prefers simple and reliable food-delivery experiences without too many complicated steps.

Lifestyle and Values

- Follows a busy, work-focused lifestyle.
- Values convenience and time-saving solutions.
- Prefers familiar restaurants and food choices.
- Looks for reliable service when ordering online.
- Uses technology regularly but does not order food frequently.

Audience Insights

Short-term goals

- Order dinner quickly when needed.
- Find suitable food without spending too much time searching.
- Receive the order reliably and on time.

Long-term goals

- Have a more convenient way to manage meals around her work schedule.
- Avoid unnecessary effort while ordering food.
- Get a consistently reliable food-delivery experience.

Barriers

Practical challenges

- Orders food online only rarely.
- May not always know which restaurant or food to choose.
- Too many choices can make food discovery difficult.
- Delivery delays can affect dinner plans.

ABILESHKALEESHWAR

He is a college student passionate about technology and self-development. With limited access to high-end devices, he seeks affordable and accessible tools for learning and development.
